approved waste disposal plant.

2.3 Other hazards

no data available

SECTION 3. Composition/information on ingredients

Chemical name	CAS-No. EC-No.	Classification (Globally Harmonized System)	Concentration [%]
4-isopropylbenzaldehyde	122-03-2 204-516-9	Acute Tox. 4; H302 Acute Tox. 5; H313 Aquatic Acute 2; H401	>= 2.5 - < 5

SECTION 4. First aid measures

4.1 Description of first aid measures

General advice	: Do not leave the victim unattended.
If inhaled	 If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.
In case of skin contact	: Take off contaminated clothing and shoes immediately. If on skin, rinse well with water.
In case of eye contact	: Remove contact lenses. Immediately flush eyes for at least 15 minutes. Get medical attention.
If swallowed	 Keep respiratory tract clear. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.
4.2 Most important symptoms	and effects, both acute and delayed
Symptoms Risks	: no data available : no data available
1.3 Indication of any immediate	e medical attention and special treatment needed

Treatment	:	no data available
SECTION 5. Firefighting meas	sure	es
5.1 Extinguishing media		
Suitable extinguishing media	:	Dry chemical Alcohol-resistant foam Carbon dioxide (CO2) Water spray
Unsuitable extinguishing media	:	no data available
5.2 Special hazards arising from	the	e substance or mixture
Specific hazards during firefighting	:	Do not allow run-off from fire fighting to enter drains or water courses.
5.3 Advice for firefighters		
Special protective equipment for firefighters	:	Wear self-contained breathing apparatus for firefighting if necessary.
Further information	:	Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.
SECTION 6. Accidental releas	e n	neasures
6.1 Personal precautions, protec	tive	e equipment and emergency procedures
Personal precautions	:	no data available
6.2 Environmental precautions		
Environmental precautions	:	Prevent product from entering drains. If the product contaminates rivers and lakes or drains inform respective authorities.
6.3 Methods and materials for co	onta	ainment and cleaning up
Methods for cleaning up	:	Wipe up with absorbent material (e.g. cloth, fleece). Keep in suitable, closed containers for disposal.
Administrative information: Report Information: SDS_IN/EN/GHS_SDS Sales & Distribution Information: MU02/FL Shipping Order Information: 28,865,029/24	/XX1	10/01

6.4 Reference to other sections

Not applicable

SECTION 7. Handling and storage

7.1 Precautions for safe handling

Advice on safe handling	 For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area.
Advice on protection against fire and explosion	: Normal measures for preventive fire protection.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers	 Containers which are opened must be carefully resealed and kept upright to prevent leakage. Electrical installations / working materials must comply with the technological safety standards.
Further information on storage conditions Advice on common storage Other data	 Ambient / 10-30°C (50-85°F) Preferably full, hermetically sealed no data available No decomposition if stored and applied as directed.

7.3 Specific end use(s)

Not applicable

SECTION 8. Exposure controls/personal protection

8.1 Control parameters

Contains no substances with occupational exposure limit values.

8.2 Exposure controls

Exposure assessment: Exposures are dependent on the product being handled, the potential for chemical release, and any resulting airborne concentrations or dermal contact. Since product handling and release scenarios vary, and no two workplaces are exactly alike, it is recommended that the potential for exposure be assessed prior to the prod-uct's use or introduction. Exposure assessments should be performed by an occupational hygienist, industrial hygienist, or other qualified occupational or environmental health professional. An exposure assessment should be conducted to determine the efficacy of any ventilation and the need for additional PPE. The PPE indicated below are recommendations for worst-case scenario exposures. An exposure assessment will identify more applicable measures to be implemented. EN and ANSI standards are mentioned in the following recommendations, consult equivalent local standards when required.

measures have to be explored is for operators trained to work	PPE is always the last resort to avoid exposure. In any case technical and organisational measures have to be explored and used prior to the selection of PPE. The PPE selection is for operators trained to work with chemicals according to good industrial hygiene and safety practice. Operators have to be trained on the use of PPE.				
8.2.1 Engineering measures					
Use engineering controls to maguidelines. If there are no apploid only with adequate ventilation.	aintain airborne levels below exposure licable exposure limit requirements or g	limit requirements or uidelines, use the product			
8.2.2 Personal protective equ	uipment				
Eye/face protection	: Use safety glasses tested accordin equivalent local standard.	g to EN 166/ANSI Z87.1 or			
Hand protection	: Use gloves when handling substan Inspect gloves prior to use. Train of only incidental exposure is expected contact to substance) use gloves the 1/ASTM F739 or equivalent local st at least 10 minutes, tested for chern of this SDS. The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.

Information displayed in section 3 (Composition/information on ingredients) is additional information to understand the hazards of the product and ensure safe handling, storage and transportation. This information, including CAS numbers, is not meant to be used for registration, notification or any other purposes. Any additional information and documentation needed may be provided by Givaudan.
