

Sustainably Sourced
Lakadong Turmeric
from Smallholder
Farmers in NE India

Lakadong Turmeric

Curcuma longa

Lakadong turmeric is a special variety of turmeric that has been awarded a **Geographical Indication (GI)** tag is grown in **Meghalaya, India**. It is renowned for its high curcumin content, which gives it a vibrant yellow color and a distinct flavor. The turmeric is grown using traditional farming practices and harvested by smallholder farmers, ensuring its purity and authenticity.

Spices	EU Organic	Conventional	Harvest
Lakadong Turmeric (Powder)		✓	November
Lakadong Turmeric (Sliced)		✓	November

Usage

Lakadong Turmeric has a wide range of applications in culinary, medicinal, skincare, and dyeing industries.

More detailed information on Lakadong is available in our technical data sheet.

Why Source from aQysta

Small Farmers. Big Impact

We power our irrigation and processing facilities by renewable energy

We offer transparency in our supply chains, open cost calculations and fair pricing with direct impact on livelihoods of marginalized farmers in India

We know each farmer and their field. We wholeheartedly support them with prepayments, training, materials and much more

Our Activities in India

Across diverse farm locations, we cultivate a wide variety of crops, ranging from spices to vegetables. Our innovative **hydropowered** irrigation equipment like the **Barsha Pump**, the **HyPump**, and the **ITP**, are deployed in several locations that provide irrigation to communities.
